

Virtual Coaching and Feedback

Providing constructive and beneficial professional feedback is a specialized skill made even more difficult in a remote context. Based on developing trust and respect with your students and coworkers, this course examines not only the art of virtual coaching but also creating and strengthening relationships with all advisees.

Virtual coaching can help students, faculty, and administrators to gain self-awareness and take more ownership of their development and career plan. Implemented correctly, advisees become amenable to coaching and the benefits that they see as a result.

We will cover the following points:

- Thinking of the “long-game” when it comes to coaching, and using a template to lay the groundwork for better coaching
- The five major mistakes that coaches make and how to overcome them
- Understanding “The Ladder of Inference” and how this contributes to misunderstanding when giving coaching and feedback
- Performance vs. Development Coaching with specific techniques for applying these skills
- Coaching each individual based on previous results while focusing on that individual's development
- Asking probing questions which allow the coached individual to help construct their action plan

Our team of training professionals, who have collectively worked with remote groups in over 75 countries, will customize your workshop to meet your specific goals and outcomes.

We will conduct an assessment before your program to ensure the training meets the specific needs of your group, whether they are just starting to navigate the virtual team environment, or have already been using various virtual tools and would like next-level guidance.

Program Details

Group Size:
Up to 20

Team Size:
N/A

Program Length:
3 to 6 hours

Space Requirement
N/A

Setting:
Indoor

Physicality:
Low

Program Elements

- ✓ Collaboration & Accomplishing Common Goal
- ✓ Individual and Team Development
- ✓ Performance & Continuous Improvement

What's Included?

The program includes professional facilitation via video conferencing platform and program materials provided to each participant.
