

## Virtual Mind Games

Get ready for a mind-bending experience! This event is designed to push the mental limits of your group or class. Players will enjoy a series of optical illusions and trick questions that will expand their brains. Creative thinking, logic, and memory skills will be put to the test while everyone tries to rack up as many points as possible to show off their brainpower!

Elements of Virtual Mind Games Include:

**Trick Questions** - Trick questions will test how sharp everyone's creative and critical thinking skills are. Our host will share these multiple-choice questions via video conferencing, and players will use our proprietary SmartHunts® app to make their best guess. The players who receive the most points are recognized at the end for their exceptional mind power!

**Brain Bending Illusions** - Everyone will get to experience brain-bending demonstrations that explore quirks in human psychology. These illusions will have people saying, "How is that possible?!" Experience feats like mixed up words still making sense, objects that appear to move while they are stationary, and other optical illusions that will leave everyone in disbelief of what their eyes are telling them.

**Mental Challenges** - Mental activities, such as a memorization challenge, have been designed to help build and flex your group's mental muscle. Warning: These challenges are not easy and will potentially tie your contestants' brains in knots!

This experience is perfect for groups that value creativity and want to encourage out of the box thinking. So get ready for the mental Olympics, this is Mind Games!
