

Virtual Scavenger Games SmartHunt®

Your group will be formed into teams based on their individual virtual locations. Virtual Scavenger Games consists of a wide range of fun and interesting missions, where teams use the SmartHunts app to receive instructions, record points, and document their experiences with photos and videos.

Each question will be revealed one at a time by our host. But hidden bonus tasks suddenly appearing and outrageous roadblock activities popping up that require teams to work together in person or remotely to successfully complete physical tests of skill and solve virtual problem-solving games and puzzles.

Activities can include Lightning Speed, Social Media Challenges, Fast Match, a Scavenger SmartHunt, Solo Challenges, Brain Teasers, and a Trivia Blitz.

At the conclusion of the experience, the SmartHunts® Host can make any special announcements, or touch on any debriefing topics that you request.

A slideshow of images and videos recorded throughout the experience is presented at the concluding awards ceremony where winners are announced and awarded virtual gold medals or other prizes of your choosing.

The SmartHunts Host can also use this time as an opportunity to highlight any member of your group, your group's accomplishments, or any other special announcement requests. We will then thank everyone for their enthusiasm and turn the Zoom Meeting back over to your representative.

Following your SmartHunt® experience, you will be provided with a detailed report of your event, including a final leaderboard, a statistical percentage of correct & incorrect answers, all photo and video files, as well as a highlight reel edited with music and custom branding!
